Furthermore, tour will continue with a visit to the brand new Copenhill, which is a combined heat and power waste-to-energy plant in Amager. It plays a major role in Copenhagen's ambitions of being zero carbon by 2025. Naturally when in the area group will also pass by World known Noma 2.0 to see their new location and gardens.

Guides from CopenHill will take you to the top of Amager Bakke by the elevator, where they will tell about the entire building: the architecture, the vision, sustainability, ski slope and the thoughts behind, all while you enjoy the view over Copenhagen and the ocean.
